DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18-24, drawn to a liquid-bearing domestic appliance having a sieve and/or a filter.

Group II, claim(s) 1-17, drawn to a replaceable component for a liquid-bearing domestic appliance.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The prior art has been identified as

4. DI: PATENT ABSTRACTS OF JAPAN vol. 2003, no. 12, 5 December 2003 -& JP 2004 254929 A (TOSHIBA CORP), 16 September 2004

5. The document D1 discloses (the references in parentheses applying to this document): A dishwashing machine (1) with a sieve system (21, 21a) which is provided adjacent to at least one of its surfaces (21a) with at least one antibiotic agent (6b). Claim 18 is therefore not novel nor inventive.

6. It follows that the following technical features within each group of claims mentioned above makes a contribution over the prior art and can be considered as a special technical features within the meaning of Rule 13.2 PCT:

7. Subject I: No technical features that makes a contribution over prior art, see DI.

8. Subject I1: A replaceable component suitable for a liquid bearing domestic appliance which comprises at least one antibiotic agent inside or on its surface and

which in use can be fixed replaceably inside a rinsing tub, sump, outlet, outlet tube and/or insert of the liquid-bearing domestic appliance.

9. The problem solved by these special technical features can therefore be construed as:

10. I: No technical features that makes a contribution over prior art, see D1.

11. II: To keep the antibiotic agent on the replaceable component on a sufficient level.

12. Consequently, neither the objective problem underlying the subjects of the claimed inventions, nor their solutions defined by the special technical features allow for a relationship to be established between the said inventions, which involves a single general inventive concept.

13. In conclusion, the groups of claims are not linked by common or corresponding special technical features and define 2 different inventions not linked by a single general inventive concept.

14. The application, hence does not meet the requirements of unity of invention as defined in Rules 13.1 and 13.2 PCT.

15. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

16. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

17. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID CORMIER whose telephone number is (571) 270-7386. The examiner can normally be reached on Monday - Thursday 8:30 - 6:00.

19. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on (571) 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

20. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
